

Behavior Based Safety Observer

-Course Summary-

Length of Course: 2 hours								
Course Objectives: <ul style="list-style-type: none"> Behavior based safety focus on the immediate safe (or unsafe) behavior and the provision of positive reinforcement to encourage safe work behavior (and reduce at-risk behaviors). Eventually after some time and commitment observers will begin to give behavior feedback informally. As this takes place, the overpowering nature of peer pressure in such a culture will motivate new and old employees to think safety. As more time passes a new "safety culture" will arise. This course helps behavioral observers understand the rationale for a Behavioral Safety process and provides the participants with the knowledge and tools they need to effectively conduct observations. 								
Topics include: <ul style="list-style-type: none"> An introduction to behavioral safety How does the process work in this organization How to conduct observations How to discuss observations Since this course includes an overview of your organization's process it will be specifically tailored to fit your organization. 								
Target Audience: <ul style="list-style-type: none"> Managers (modify based on each course) Supervisors Safety Program Administrators <ul style="list-style-type: none"> Employees Safety Committee Representatives Anyone with an interest in safety
