

Noise Survey/ Dosimetry

OUR QUALIFICATIONS, EXPERIENCE, ADAPTABILITY AND COMMITMENT TO CUSTOMER SERVICE ARE SECOND TO NONE!

Service description:

- Noise is one of the most common occupational health hazards. Permanent hearing loss is the main health concern however annoyance, stress and interference with speech and emergency communications are also concerns
- Employers have an obligation to protect their workers from this debilitating hazard. To prevent adverse outcomes of noise exposure, noise levels should be measured and then controlled to acceptable levels
- As a first step in dealing with noise, workplaces need to identify operational areas where excessive exposure to noise occurs
- Your Safety Coach will work with you to complete a Noise Assessment for your operation including area noise mapping and/or personal dosimetry to accurately measure the noise for your specific occupations
- After we obtain the noise measurement results we will offer practical advice on noise control measures to protect you and your employees from the detrimental harm of noise

You should take advantage of this service if you....

- Are initiating a new process
- Have changed an existing process
- Want to protect your employees
- Have employees who require hearing protection
- Want to comply with current regulations and standards
- Want to protect your business from future litigation

Benefits of this service:

- Document compliance with industry standards
- Protect your employees
- Protect your company

Service scope and price schedule:

- Since each company has unique noise requirements it would be our pleasure to provide you with a detailed scope of work and price schedule based on your needs
