

Heat Stress Monitoring

OUR QUALIFICATIONS, EXPERIENCE, ADAPTABILITY AND COMMITMENT TO CUSTOMER SERVICE ARE SECOND TO NONE!

Service description:

- "Heat stress" is the overall heat burden on the body from a combination of risk factors
- Heat stress should not be taken lightly. It is a serious condition that results in hundreds of fatalities each year
- There is a high potential for inducing heat stress in your employees if your operations contain any of the following risk factors:
 - high air temperatures, radiant heat sources, high humidity, direct physical contact with hot objects, or strenuous physical activities
- Your Safety Coach can assist you by monitoring your workers exposure using traditional WBGT methods in addition to modern heat dosimetry
- After we obtain true physiological measurements of the heat stress we will offer practical advice to protect you and your employees from heat related illnesses

You should take advantage of this service if you....

- Have employees exposed to high air temperatures, radiant heat sources, high humidity, direct physical contact with hot objects, or strenuous physical activities
- Want to comply with current regulations and standards
- Want to protect your business from future litigation
- Want to protect your employees

Benefits of this service:

- Document compliance with industry standards
- Protect your employees
- Protect your company

Service scope and price schedule:

- Since each organization has unique requirements it would be our pleasure to provide you with a detailed proposal outlining the scope of work and prices based on your needs
